

Ballymore **RESOURCES**

Quarterly Report

For the quarter ending
31 March 2024

ballymoreresources.com

**OUTSTANDING DRILLING
RESULTS AT DITTMER
THE HIGHLIGHT IN
ANOTHER PRODUCTIVE
QUARTER FOR
BALLYMORE.**

Highlights

- Dittmer Stage 4 drilling commenced with all holes successfully intersecting the targeted Duffer bonanza gold lode. Highlights include:

Drill hole DTDD031

2.9m @ 16.01g/t Au

Drill hole DTDD032

3.15m @ 8.99g/t Au

- Two grants totalling A\$600,000 secured from Queensland Government's Collaborative Exploration Initiative for geophysics programs at Dittmer and Ruddygore.

Post-Quarter

- Stage 4 drilling delivers high-grade gold results at Dittmer Gold Project, doubling known gold/copper mineralisation area.
- Ballymore co-founder and Technical Director Mr David A-Izzeddin appointed as Managing Director of the Company.
- A\$7.6m Dittmer funding received.

Dittmer Project

Proserpine, Queensland | 100% Ownership

EPM 14255, EPM 26912, EPM 27282, ML 10340, ML 10341, MLA 100351)

The Dittmer Project is located 20km west of Proserpine in Central Queensland and comprises two granted MLs, one ML application and three granted EPMs covering an area of 513km². Ballymore has successfully identified an extension to the historic high-grade orebody and is engaged in studies with the aim of re-opening the Dittmer Mine, which operated during the 1930 – 50’s at a reported gold head grade of 151 g/t Au¹.

In January, the Company commenced its Stage 4 diamond drilling program totalling 2,933.1m across 14 holes (DTDD029 – 042B) to test a number of high-grade shoots in the displaced extension of the high-grade Duffer Lode at the historic Dittmer Mine.

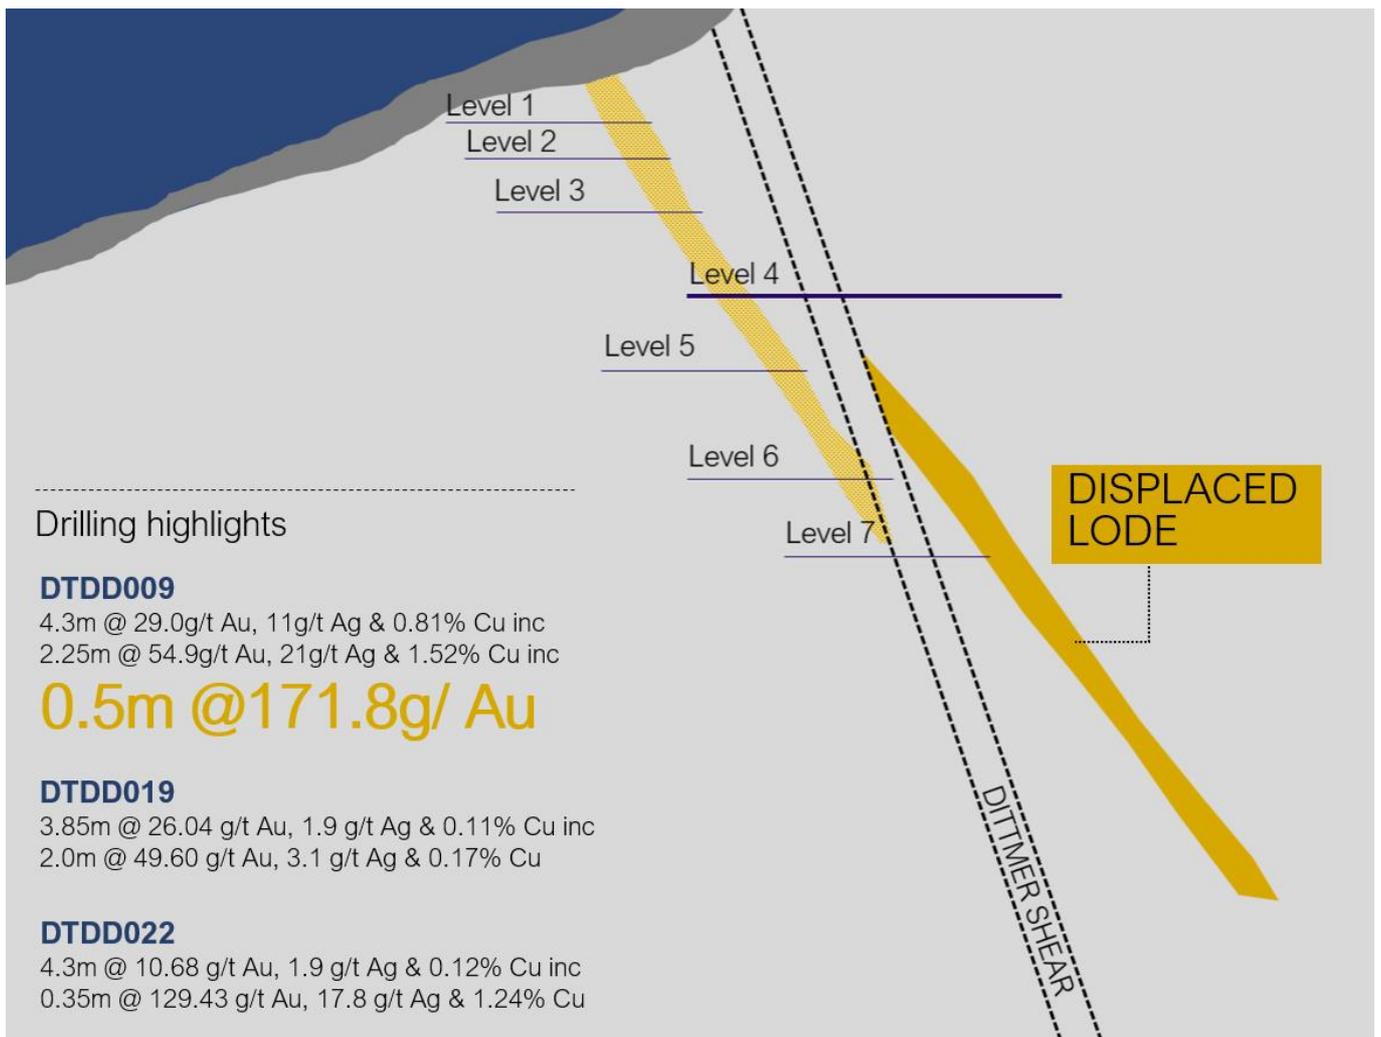

Figure 1 - Cross section of displaced Duffer Lode with underground workings and modelled lode extension confirmed by Ballymore drilling.

¹ DeRisk P2021-25: Independent Geologist Report – Queensland Exploration Assets - Ballymore Resources Ltd

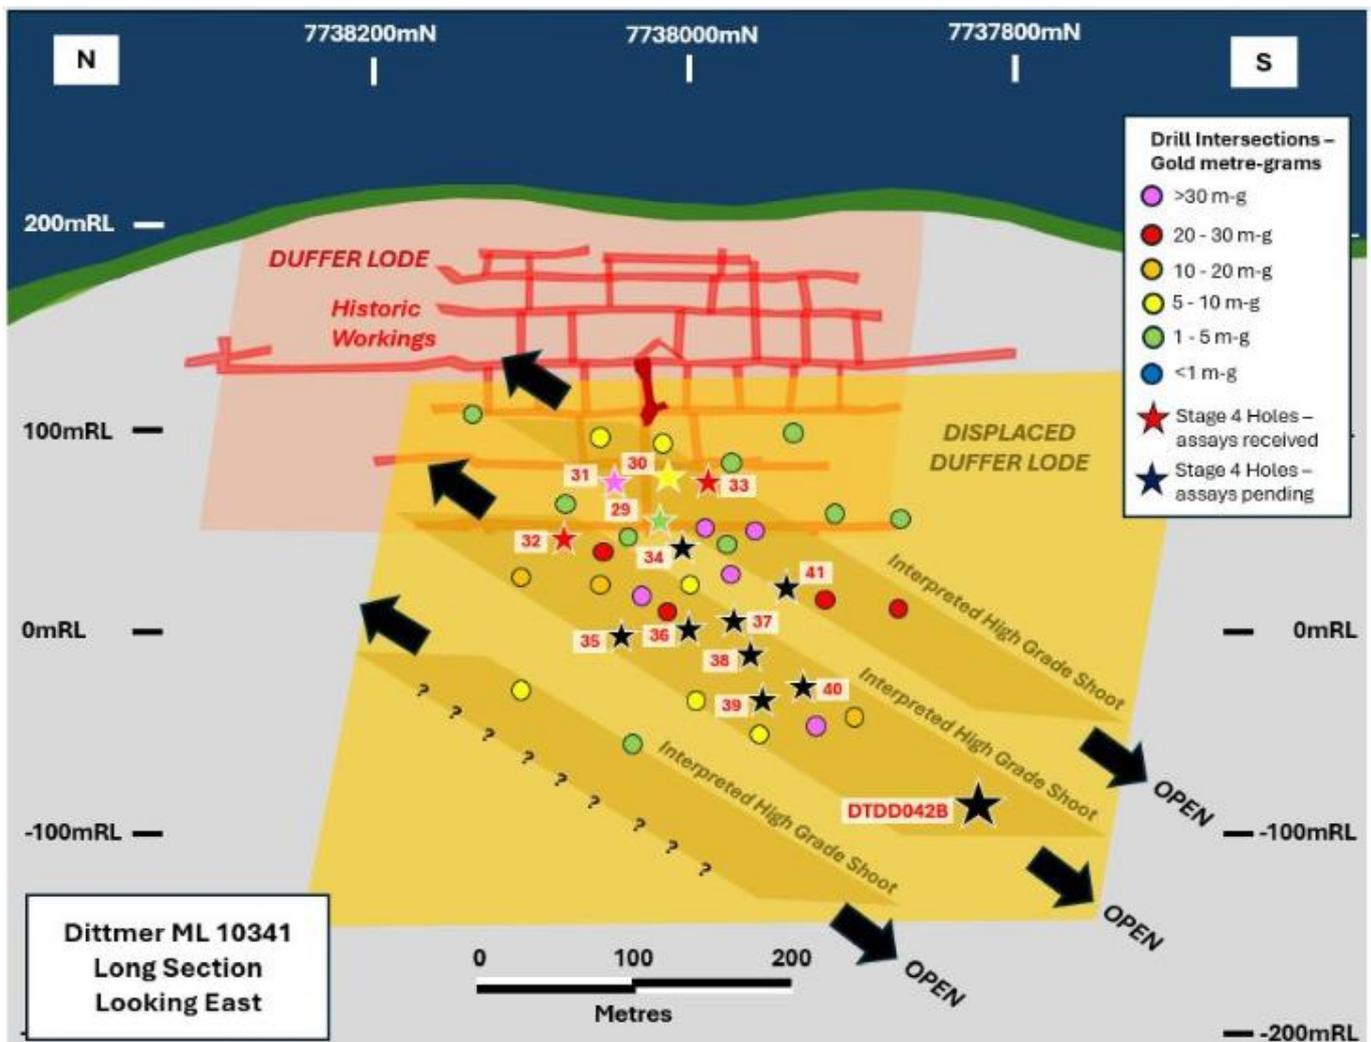

Figure 2. Long section looking east at the Dittmer Mine area showing location of drill holes including the recent Stage 4 drill holes (stars).

Drilling to date has targeted a 250m x 200m area adjacent to the historic Dittmer mine and has demonstrated that this area hosts extensive vein-hosted, bonanza gold mineralisation with associated copper and silver mineralisation. This Stage 4 program continues to demonstrate excellent continuity of the displaced lode with all 42 holes drilled to date intersecting the targeted Duffer Lode, in line with the geological model. Subsequent to the end of the quarter, Ballymore announced initial results from this program, including **2.9m @ 16.01 g/t Au (including 0.9m @ 51.21 g/t Au)** in drill hole DTDD031.

Results have been received for the first five holes (DTDD029 – 033) and already reported some significant results:

- **DTDD031:** 2.9m @ 16.01 g/t Au, 4.7 g/t Ag & 0.15% Cu from 109.6m including
 - 0.9m @ 51.21 g/t Au, 14.6 g/t Ag & 0.26% Cu from 109.6m
- **DTDD032:** 3.15m @ 8.99 g/t Au, 1.8 g/t Ag & 0.04% Cu from 93.85m including
 - 0.35m @ 79.32 g/t Au, 14.5 g/t Ag & 0.26% Cu from 94.75m
- **DTDD033:** 1.80m @ 12.85 g/t Au, 1.4 g/t Ag & 0.05% Cu from 67.2m including
 - 1.2m @ 19.13 g/t Au, 1.8 g/t Ag & 0.07% Cu from 67.8m including
 - 0.4m @ 54.64 g/t Au, 3.5 g/t Ag and
 - 0.03% Cu from 67.8m

- **DTDD030:** 8.08m @ 0.98 g/t Au, 1.9 g/t Ag & 0.05% Cu from 49.17m including 0.43m @ 13.90 g/t Au, 28.9 g/t Ag & 0.75% Cu from 53.37m
- **DTDD029:** 3.5m @ 0.85 g/t Au, 1.0 g/t Ag & 0.01% Cu from 84.0m including 0.5m @ 5.19 g/t Au, 5.4 g/t Ag & 0.02% Cu from 87m

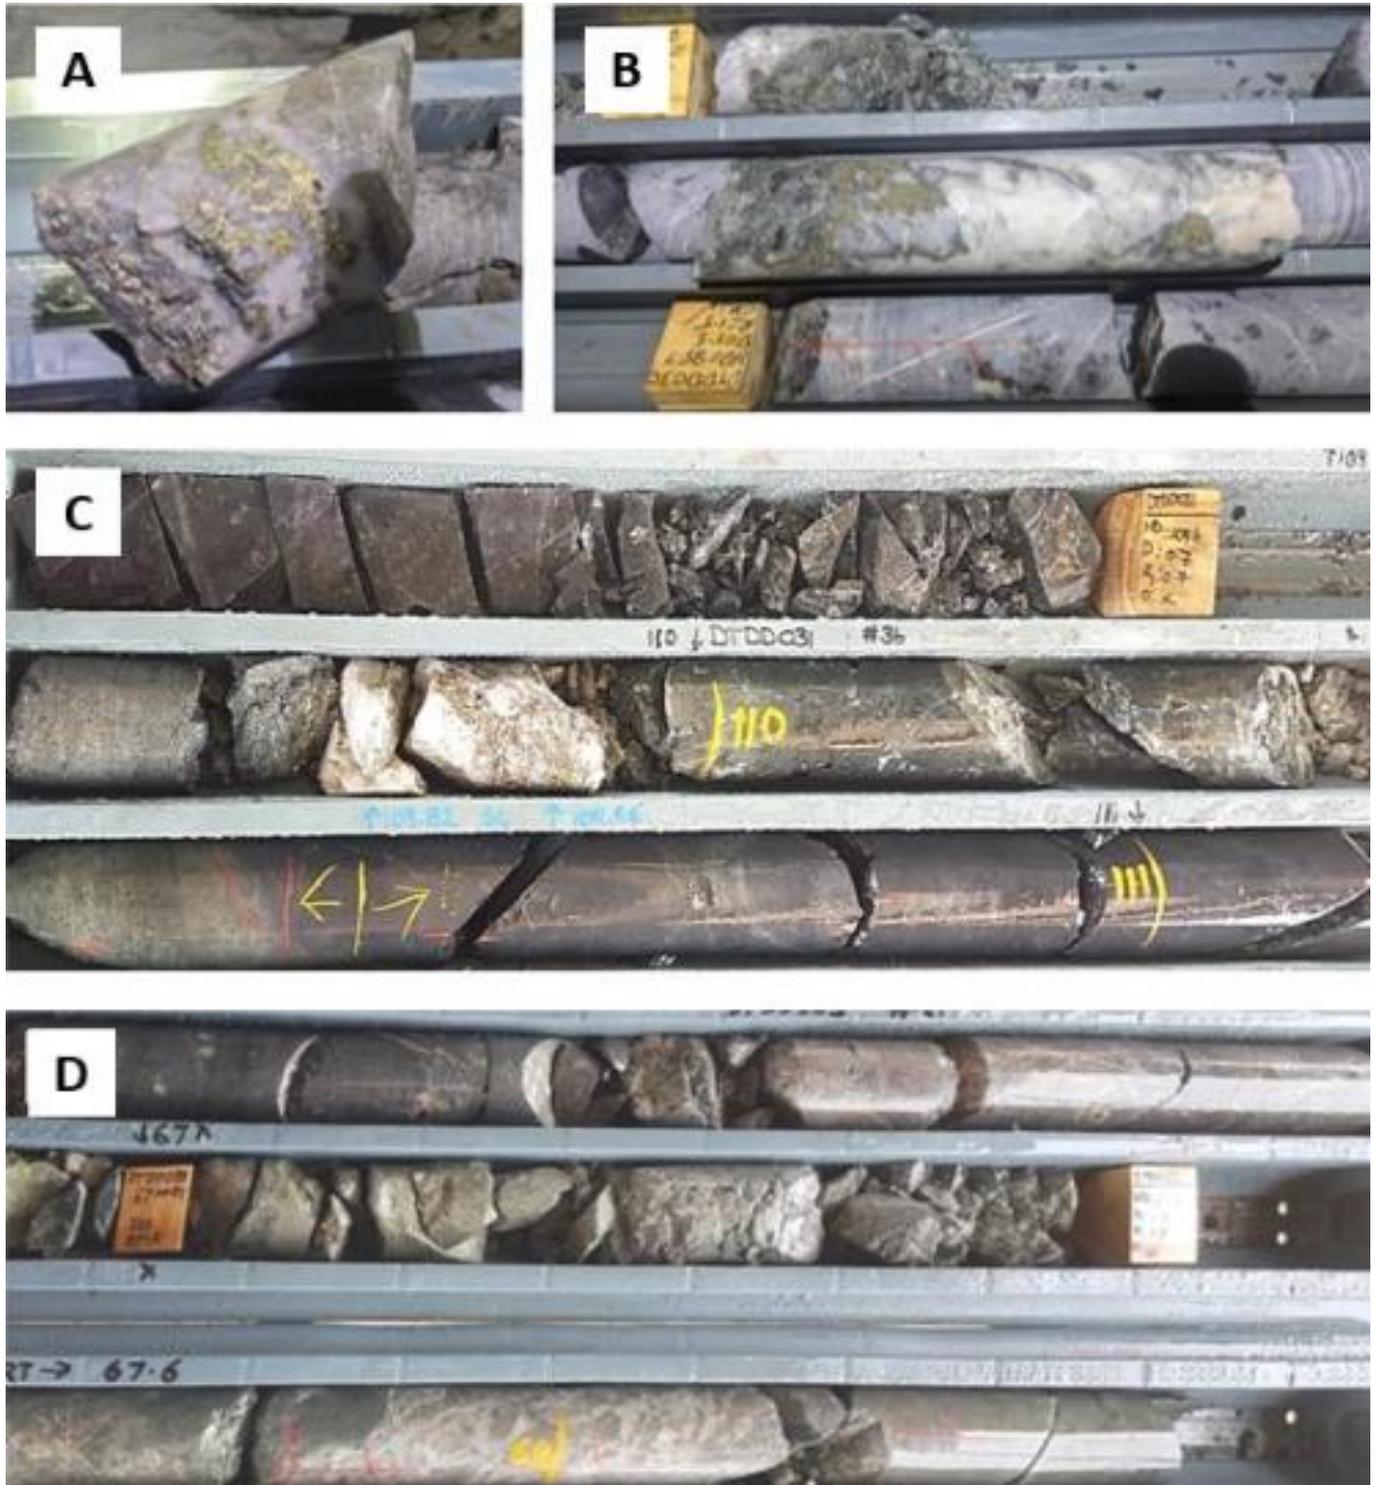

Figure 3 – (A) 10cm wide quartz-chalcopyrite-pyrite vein (DTDD030: 53.65 – 53.75m); (B) 30cm sheared quartz-pyrite vein (DTDD030: 86.9 – 87.2m); (C) Sheared and chlorite altered volcaniclastic rock overprinted by sheared 12cm quartz-pyrite-carbonate-chalcopyrite veins (DTDD031: 109.82 – 109.94m); (D) Faulted, brecciated volcanic overprinted by quartz-pyrite-chalcopyrite breccia zone (DTDD033: 67.8 – 68.2m).

As part of this Stage 4 program, some step-out holes have also been completed, including DTDD042B, which was completed 100m beneath and 100m south of all previous drilling and represents the deepest drill hole ever completed into the Duffer Lode. This hole intersected a broad shear zone from 292.3 - 302.7m with a number of veins including the main lode, a quartz-carbonate-chalcopyrite-pyrite vein, at 301.3 - 301.7m. The structure appears to be getting broader than in shallower intersections and the quartz-carbonate-sulphide veins are considered to be similar in style to previously drilled lode intersections. Assay results for the remaining drill holes in the Stage 4 program, including DTDD042B, are expected to be received during May.

The results received to date for this latest drill program are very encouraging and further add to our understanding of the mineralised system. Furthermore, a number of holes have also encountered significant copper mineralisation, potentially pointing to a more significant copper-gold system at depth.

Preparations are also well advanced to commence surface drilling in the greater Dittmer area, to test the lateral extent of this exciting discovery, as demonstrated by the large geochemical footprint and presence of high-grade historic surface workings over more than 2km, which have never been drilled before.

Figure 4. Ore zone in DTDD042B (299.5 – 304.3m) including quartz-carbonate-chalcopyrite-pyrite veins within sheared, silicified volcanics².

² **Cautionary statement:** Information in this announcement contains references to visual results. The Company draws attention to the inherent uncertainty in reporting visual results. Visual estimates of mineral abundance should never be considered a proxy or substitute for laboratory analyses where concentrations or grades are the factor of principal economic interest.

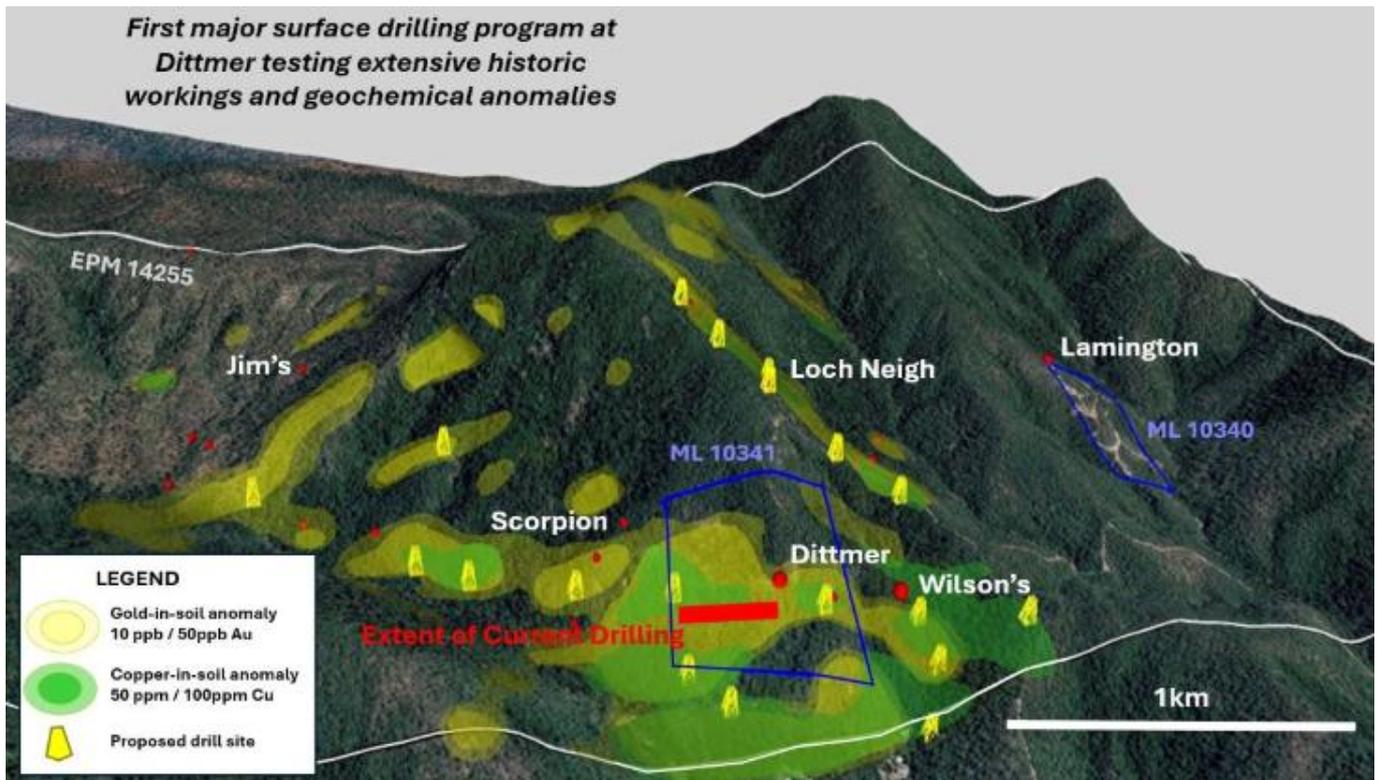

Figure 5. View of the Dittmer Project area looking west showing soil geochemistry gold and copper anomalies and proposed drill collar locations.

The Dittmer mining lease is surrounded by more than two kilometres of other shallow historic workings which were mined at extremely high grades (e.g. Loch Neigh – 567 g/t Au, Scorpion 355 g/t Au, Golden Gem – 278g/t Au) but have never been drill tested, much like Dittmer.

Recent geochemical work has shown the surrounding region is highly anomalous for both gold and copper. With several geophysical targets and further significant old workings along a 20km trend, indications are that this could be part of a much larger gold/copper system similar in style to the Ravenswood mine.

Collaborative Exploration Initiative (CEI) Grant for Dittmer heli-borne gradient magnetic and radiometric survey³

In March, Ballymore was awarded AS\$600,000 in Cooperative Exploration Initiative (CEI) grants from the Queensland Government to fund new geophysical surveys at its Dittmer and Ruddygore projects.

Cooperative Exploration Initiative (CEI) grants are awarded annually by the Queensland Government through a competitive application process. Ballymore received one Queensland Government CEI grant for \$300,000 to undertake an 8,051 line-kilometre, low level heli-borne gradient magnetic and radiometric survey covering our entire Dittmer Project area as well as the neighbouring Julivon Creek EPM, held by our project partner for this survey, BGM Investments Pty Ltd (BGM).

The Dittmer Project hosts a range of vein-hosted, breccia-hosted, skarn-hosted and porphyry-style deposits dominated with copper, gold, silver and other base and critical minerals. The survey area covers numerous historic mines and prospects including porphyry-related copper deposits (eg. Julivon

³ Refer to ASX Announcement, dated 25 March 2024 “Ballymore awarded \$600K in CEI Funding”

Creek/Copperhead, Andromache) and vein- and stockwork-hosted gold-copper epithermal and mesothermal deposits (e.g. Dittmer, Cedar Ridge).

Ballymore proposes to engage New Resolution Geophysics (NRG™) to undertake the survey using an ASTAR B-series helicopter fitted with the Xplorer™ system. This advanced system collects high resolution magnetic data using a broader line spacing, saving money and improving safety. The collected magnetic data will subsequently be modelled and the resultant 3D data will be integrated into the Company's existing 3D models to better delineate alteration / mineralised systems as well as geological bodies.

The Dittmer survey will assist in refining the large gold-copper geochemical anomaly defined by our extensive soil survey completed last year around the Dittmer mine as well as potentially delineating other new intrusive-related gold-copper systems within the project area. To date our drilling has only tested around the high-grade Dittmer mine workings over a strike length of 250m, and results of our soil sampling program indicate that this forms part of a far larger system with a strike length exceeding 2km. This planned airborne magnetic survey will add further information about this exciting target as well as other targets in the greater Dittmer Project area.

Figure 6. NRG's Xplorer™ heli-borne gradient magnetometer system proposed to complete a detailed magnetic survey over the Dittmer project area and funded by a Queensland State Government CEI grant.

Ruddygore Project

Chillagoe, Queensland | 100% Ownership
EPM 14015, EPM 15047, EPM 15053, EPM 27840

The Ruddygore Project is located adjacent to the town of Chillagoe in North Queensland and approximately 150 km west of Cairns. It covers an area of 556 km². Historically, Chillagoe was a significant mining and smelting centre that was most active from 1888 to 1927, prior to further substantial production of gold, copper and silver from the Red Dome mine from 1986 to 1997.

During the quarter, a review of publicly available historic geochemical and geophysical data sets, as well as data collected by Ballymore was undertaken. A number of areas of significant multi-element geochemical anomalism have been identified for further follow up.

Collaborative Exploration Initiative (CEI) Grant for Maniopota Heli-borne EM Survey⁴

In March, Ballymore also received a grant for AS\$300,000 from the Queensland Government to undertake a semi regional heli-borne EM survey over a large portion of the highly prospective Chillagoe Formation rock unit, which hosts numerous major mines including Red Dome, Mungana, Redcap and Victoria to the north, and Mount Garnet to the south. The Maniopota target exhibits remarkably similar characteristics to these historic mines. The survey will cover the Maniopota prospect within Ballymore's Ruddygore Project and will be the first EM geophysical assessment of the area in over 50 years.

The Maniopota prospect contains classic skarn-hosted mineralisation, similar in style to other deposits and mines in this area, and recent multi-element soil and rock chip sampling completed by Ballymore has identified broad polymetallic anomalies over 6.5km. Maniopota has proven mineralisation of zinc and copper as well as lead and silver. Ballymore has also recognised anomalous geochemical enrichment of bismuth in soil and rock chips as well as Platinum Group Elements (PGEs) including platinum and palladium in soil. Enrichment has also been identified for other critical minerals such as antimony and selenium with moderate enrichment values for indium, tungsten and tin.

Ballymore is proposing to use the highly advanced SkyTEM heli-borne EM system to complete the survey. The SkyTEM helicopter time-domain EM system provides high-resolution conductivity imaging to map accumulations of conductive material such as semi-massive and massive sulphides, with maximum exploration depth and enhanced sensitivity to conductive targets. The addition of this innovative and valuable geophysical dataset in collaboration with geological and geochemical datasets already collected by Ballymore, should allow the development of exciting drill targets in this region, that will be drill-ready later in 2024.

⁴ Refer to ASX Announcement, dated 25 March 2024 "Ballymore awarded \$600K in CEI Funding"

Figure 7. SkyTEM's low-frequency time domain EM and magnetic system. proposed to complete a detailed heli-borne EM survey over the Maniopota prospect (Ruddygore Project) and funded by a Queensland State Government CEI grant.

Ravenswood Project

Charters Towers, Queensland | 100% Ownership

EPM 18424, EPM 18426, EPM 18637, EPM 25466, EPM 25467. EPMA 28565

The Ravenswood Project is located to the south and east of Charters Towers in North Queensland and consists of five granted EPMs covering an area of 309 km². The Ravenswood Project contains numerous prospects, historic drill intersections and geochemical anomalies located within the 17-million-ounce Charters Towers gold province including vein-hosted gold targets (e.g. Day Dawn, Pinnacle Creek) and Mount Leyshon style breccia pipe-hosted targets (e.g. Seventy Mile Mount, Matthews Pinnacle).

Field work at the Day Dawn prospect, located 25 km east-southeast of Charters Towers, has identified a previously unrecognised, significant vein system. Mapping has defined a large zone of mineralised quartz veining over an area of 1,400m x 1,000m with an associated gold-in-soil anomaly. A series of 0.2 – 2.0m veins have been mapped and generally dip moderately towards the northeast with examples of visible gold recognised in some veins. The quartz lodes are highly anomalous in gold and silver with rock chip samples reporting up to **127.5 g/t Au and 7100 g/t Ag**. An IP survey was also completed to map the lodes under shallow cover. Eight lines of 50m dipole-dipole IP geophysical data were collected over the Day Dawn prospect and mapped potential extensions to mapped lodes as resistivity lows under cover⁵. During the quarter, preparations were made to undertake the initial drilling program to test this target. This drill program is expected to be completed mid-2024.

Preparations are also underway to resume field work at the Pinnacle Prospect, located east of Mount Leyshon. The Pinnacle prospect hosts a number of breccia-hosted and vein hosted gold prospects, including Matthews Pinnacle, Seventy Mile Mount and Pinnacle Creek. Field programs in this area will include mapping and soils sampling, testing the greater area of this potentially major mineralised system.

⁵ Refer to ASX Announcement, dated 4 October 2022 “Outstanding results for Day Dawn Deposit, Ravenswood Project”

Mount Molloy Project

Charters Towers, Queensland | 100% Ownership
EPM 27918

The Mount Molloy Project comprises one granted EPM covering an area of 78km² and is located south of the town of Mount Molloy and 50 km northwest of Cairns. Mount Molloy represents a high-grade volcanogenic-hosted massive sulphide (“VHMS”) copper deposit that was discovered in 1883. The deposit was mined intermittently from 1883 to 1942 with ore zones assaying up to 20% copper. There was also a significant amount of high-grade zinc ore encountered, but this was not mined due to the lack of market at the time. Production figures are incomplete, although records suggest a total of 43,600 tons of ore was mined, producing 3,900 tons of copper metal at 8.7% Cu.

Previous field work completed by Ballymore has located significant copper mineralisation at Mount Molloy with rock chip samples reporting up to **31.81% Cu, 2.28% Zn and 300 g/t Ag**. Soil sampling has defined a significant copper-in-soil anomaly over the main Mount Molloy mine area, as well as a significant anomaly, located north of the mine area, centred over a hill with a historic adit developed into it through copper-stained brecciated sediments. This anomaly remains open to the north and is untested by drilling, with the focus of previous drilling being on testing the mine area.

No activities were completed at Mount Molloy due to wet weather. Further field programs including mapping and soil sampling will be undertaken following the cessation of the wet season.

Corporate

Cash Position

As at 31 March 2024, the Company held \$2.1 million cash at bank.

ASX Listing Rule 5.3 Disclosure

\$1.00m exploration spend during the quarter can be summarised as:

- \$0.74m on drilling, mapping, metallurgical testwork and mining studies on the Dittmer project;
- \$0.17m on geochemical and geophysical reviews and preparations for drilling on the Ruddygore project;
- \$0.07m on mapping and soil sampling and preparations for further drilling activities at the Ravenswood Project; and
- \$0.02 on geochemical and geophysical reviews on Mount Molloy and discussions with local landholders.

\$203,000 was paid during the quarter to Related Parties, as reported in clause 6 of the ASX Appendix 5B (Cash Flow Report). This comprises directors' fees.

Equity Raising

During the Quarter, Ballymore finalised a US\$5 million investment by Taurus in its Dittmer Gold Project near Proserpine in north Queensland via a variable gross royalty, with all conditions precedent satisfied. The funds (A\$7,575,758) were received in April 2024 and represent the major component of a A\$11.2 million total funding package secured in December 2023.

Managing Director appointment

Subsequent to the end of the quarter, Ballymore board member Mr David A-Izzeddin was appointed to the position of Managing Director. Mr A-Izzeddin co-founded the Company alongside Nick Jorss and Andrew Gilbert in April 2019, and has held the position of Technical Director since the Company's IPO in September 2021.

Mr A-Izzeddin is a geologist with over 30 years' experience in exploration, project assessment, feasibility studies, mine development and business development across a broad range of commodities including gold, base metals, iron, uranium, phosphate and bauxite and has worked in, Asia-Pacific, Europe, North and South America and Australia with specific knowledge of exploration in north Queensland. He played a major role in the discovery of Mount Wright (1.0 Moz Au) and the Sarsfield/Nolan's complex (4.8 Moz Au), both of which are located near Ravenswood and of similar styles to the types of deposits the Company is seeking there.

Collaborative Exploration Initiative (CEI) Grants for \$600,000

In March, Ballymore was awarded AS\$600,000 in Cooperative Exploration Initiative (CEI) grants from the Queensland Government to fund new geophysical surveys at its flagship Dittmer Project and Ruddygore Project in north Queensland.

CEI grants are awarded annually by the Queensland Government through a competitive application process. The funds awarded to Ballymore will cover:

- A\$300,000 to conduct a low level heli-borne gradient magnetic and radiometric survey over the entire Dittmer project area to assist delineating additional intrusive-related copper and gold targets and refining drill targets.
- A\$300,000 to conduct a heli-borne electro-magnetic survey (EM) at the Ruddygore Project's Maniopota prospect to advance target definition of this major polymetallic mineralised system.

Tenement Interests

As at 31 March 2024, the Company had interests in the following tenements (as required by Listing Rule 5.3.3). There were no changes in the Company's interests in tenements during the quarter.

Country	Location	Project	Tenement	Status	Current Interest (%)
Australia	Queensland	Dittmer	ML 10340	Granted	100%
Australia	Queensland	Dittmer	ML 10341	Granted	100%
Australia	Queensland	Dittmer	EPM 14255	Granted	100%
Australia	Queensland	Dittmer	EPM 26912	Granted	100%
Australia	Queensland	Dittmer	EPM 27282	Granted	100%
Australia	Queensland	Ruddygore	EPM 14015	Granted	100%
Australia	Queensland	Ruddygore	EPM 15047	Granted	100%
Australia	Queensland	Ruddygore	EPM 15053	Granted	100%
Australia	Queensland	Ruddygore	EPM 27840	Granted	100%
Australia	Queensland	Ravenswood	EPM 18424	Granted	100%
Australia	Queensland	Ravenswood	EPM 18426	Granted	100%
Australia	Queensland	Ravenswood	EPM 18637	Granted	100%
Australia	Queensland	Ravenswood	EPM 25466	Granted	100%
Australia	Queensland	Ravenswood	EPM 25467	Granted	100%
Australia	Queensland	Mount Molloy	EPM 27918	Granted	100%
Australia	Queensland	Ravenswood	EPMA 28565	Application	N/A
Australia	Queensland	Dittmer	MLA 100351	Application	N/A

Approved by the Board of Ballymore Resources Limited.

Company Profile

Ballymore holds a portfolio of exploration and development projects in prolific Queensland mineral belts that are highly prospective for gold and base metals. These consist of two granted Mining Leases (MLs) and fourteen Exploration Permits over four project areas at Dittmer, Ruddygore, Ravenswood and Mount Molloy. The total area covered by the tenements is 1,456 km².

Known deposits in Northeast Queensland include Kidston (5 Moz Au), Ravenswood/Mount Wright (5.8 Moz Au), Mount Leyshon (3.8 Moz Au), Red Dome/Mungana (3.2 Moz Au) and Mt Morgan (7.8 Moz Au and 374 Kt Cu). The deposits occur in a wide range of geological settings including porphyries, breccias, skarns and veins.

Important Notices

Competent Persons Statement

The information in this announcement that relates to Exploration Results is based on information compiled or reviewed by Mr David A-Izzeddin. The Company is not aware of any new information or data that materially affects the information included in these Company Announcements and in the case of reported Mineral Resources, all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. Mr A-Izzeddin is a Member of The Australasian Institute of Geoscientists and is a Director and an employee of the Company. Mr A-Izzeddin has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr A-Izzeddin consents to the inclusion in the announcement of the matters based on his information in the form and context in which it applies. The Exploration Targets described in this announcement are conceptual in nature and there is insufficient information to establish whether further exploration will result in the determination of Mineral Resources.

Exploration Results & Exploration Target

Ballymore confirms that Exploration Results and Exploration Targets used in this document were estimated, reported and reviewed in accordance with the guidelines of the Australian Code for the Reporting of Exploration Results, Mineral Resources and Ore Reserves (The JORC Code) 2012 edition. Ballymore confirms that it is not aware of any new information or data that materially affects the Exploration Results or Exploration Target information included in the following announcements:

- *1 - Ballymore Prospectus released on 1 September 2021
- *2 - "Acquisition of 100% of Ravenswood Project" released on 18 November 2021
- *3 - "Initial Results for Dittmer Underground Sampling & Drilling" released 29 September 2021
- *4 - "High Grade Drilling Results and Visible Gold at Dittmer" released 25 October 2021
- *5 - "Broad Near Surface Copper Intersection at Ruddygore" released 15 July 2022

Forward-Looking Statements

Certain statements made during or in connection with this statement contain or comprise certain forward-looking statements regarding the Company's Mineral Resources, exploration operations and other economic performance and financial conditions as well as general market outlook. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, such expectations are only predictions and are subject to inherent risks and uncertainties which could cause actual values, results, performance or achievements to differ materially from those expressed, implied or projected in any forward-looking statements and no assurance can be given that such expectations will prove to have been correct.

Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic and market conditions, delays or changes in project development, success of business and operating initiatives, changes in the regulatory environment and other government actions, fluctuations in commodity prices and exchange rates and business and operational risk management. Except for statutory liability which cannot be excluded, each of the Company, its officers, employees and advisors expressly disclaim any responsibility for the accuracy or completeness of the material contained in this statement and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this statement or any error or omission. The Company undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after today's date or to reflect the occurrence of unanticipated events other than required by the Corporations Act and ASX Listing Rules. Accordingly, you should not place undue reliance on any forward-looking statement.

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7. Financing facilities	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity.</i>		
<i>Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1 Loan facilities	N/A	
7.2 Credit standby arrangements		
7.3 Other (please specify)		
7.4 Total financing facilities		
7.5 Unused financing facilities available at quarter end		
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(326)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(997)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(1,323)
8.4 Cash and cash equivalents at quarter end (item 4.6)	2,105
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	2,105
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	1.6
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: Yes	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: During the Quarter, Ballymore finalised a US\$5 million investment by Taurus in its Dittmer Gold Project via a variable gross royalty, with all conditions precedent satisfied. The funds (A\$7,575,758) were received in April 2024.	
8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer: Yes, see above.	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

By the Board
Duncan Cornish
CFO and Company Secretary
30 April 2024

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
