

Ballymore **RESOURCES**

# Quarterly Report

For the quarter ending  
30 September 2023

[ballymoreresources.com](http://ballymoreresources.com)

Ballymore has four highly prospective projects in prolific Queensland mineral belts which have produced 40Moz gold as well as significant copper, lead, zinc and other critical minerals.

## Highlights

- Appointment of Mr Andrew Greville as Non-Executive Chairman
- Dittmer Mine Studies Underway Following Further Positive Drill Results
- Significant soil anomaly defined at Mount Molloy

### Post Quarter:

- Outstanding Gold in Soils Confirm Dittmer Project as Major Mineralised System.
- Dittmer metallurgical testwork confirms excellent gold, silver and copper recoveries.

Drill core from drill hold DTDD009 showing quartz-chalcopyrite vein material grading 171.8g/t Au, 56.4 g/t Ag and 5.28% Cu (See ASX Announcement 4 July, 2023).

# Dittmer Project

Proserpine, Queensland | 100% Ownership

EPM 14255, EPM 26912, EPM 27282, ML 10340, ML 10341, MLA 100351

**The Dittmer Project is located 20km west of Proserpine in Central Queensland and comprises two granted MLs, one ML application and three granted EPMs covering an area of 513 km<sup>2</sup>. Ballymore has successfully identified an extension to the historic high-grade orebody and is engaged in studies with the aim of re-opening the Dittmer Mine, which operated during the 1950s at a reported gold head grade of 151 g/t<sup>1</sup>.**

During the quarter, the Company announced that the final stage 3 drill hole assays from Dittmer had returned further ore grade intersections in close proximity to existing workings and broad mineralised zones at depth.

Final results from the Stage 3 drilling program have included:

**DTDD024** 11.6m @ 2.37 g/t Au, including  
3.43m @ 7.16 g/t Au, 0.83m @ 27.98 g/t Au

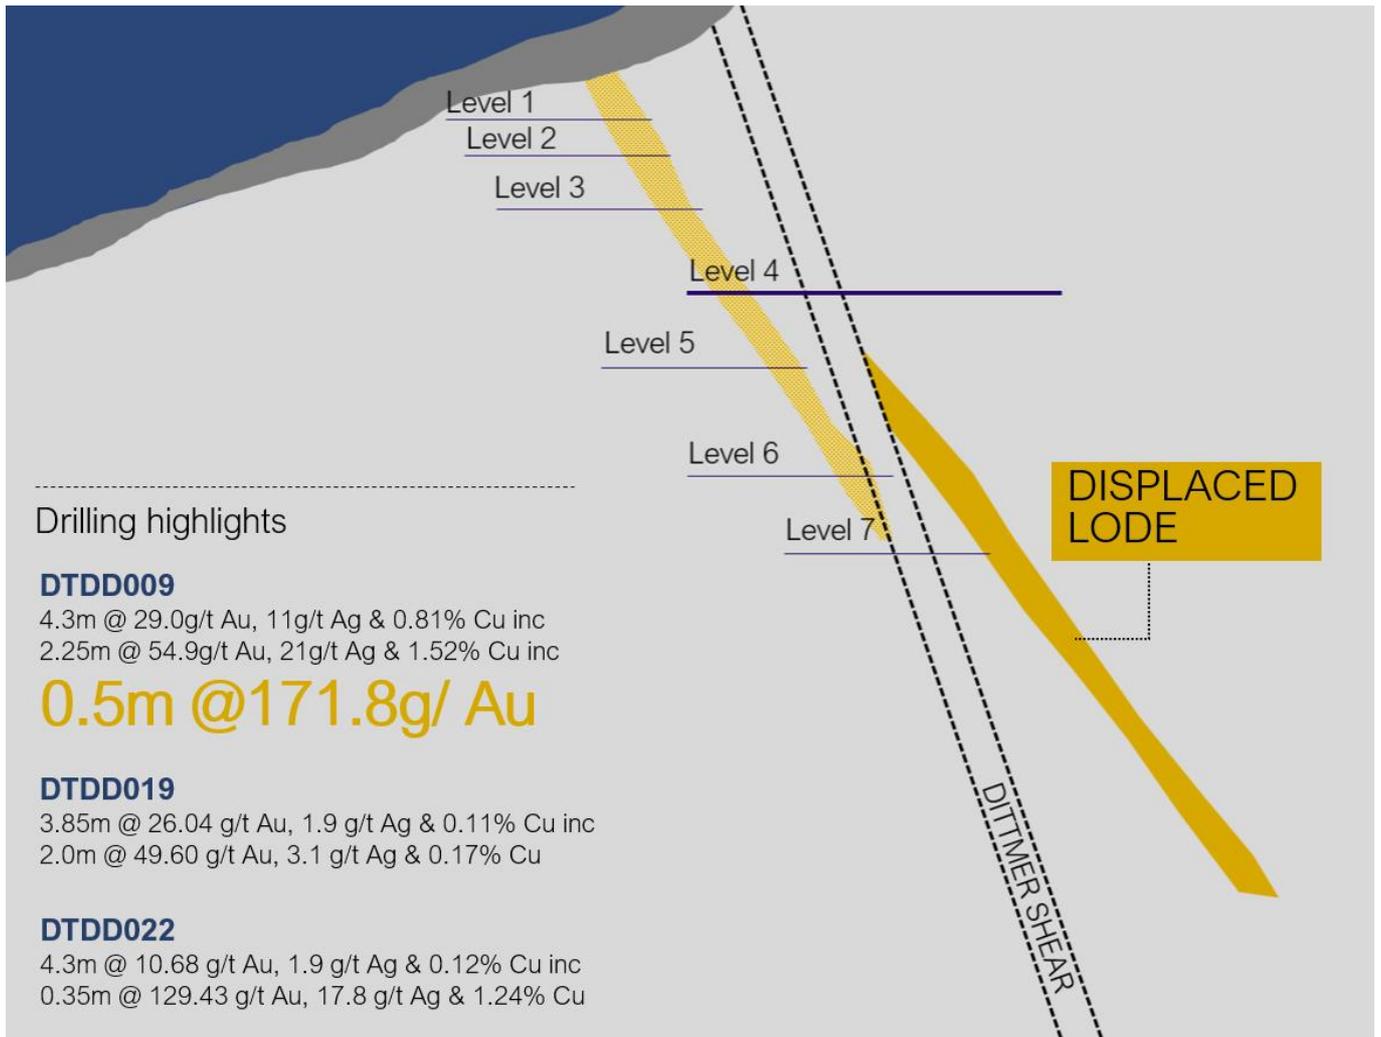

**DTDD025** 3.4m @ 2.6 g/t Au, including  
0.3m @ 24.9 g/t Au

The gold mineralisation encountered in holes **DTDD026 - 028** is located within 20m of the current surface access drive and shows the potential for near term mining access to ore.

Ballymore has now completed 5,703m of drilling at the project with 28 holes out of 28 encountering gold with excellent continuity for a 100% strike rate. Drilling has confirmed that the main lode has been displaced and continues less than 30m away from historic workings and existing underground access. The lode remains open in all directions and is broadening at depth. This is a terrific result and could greatly reduce development capital costs in any future mining operation.

With strong continuity of mineralisation and high grades now being confirmed at Dittmer, Ballymore commenced mine development studies during the quarter, including a Mineral Resource review, metallurgical test work (complete), geotechnical studies and survey pick-ups of the proposed site to support studies for a potential mine re-opening within the existing mining lease. In addition, Ballymore has commenced an application for a larger mining lease surrounding ML 10341. Meetings have been held with the Department of Resources (DOR) and Department of Environment and Science (DES) and documentation was prepared and submitted for Mining Lease Application (MLA) 100351 on 20 July 2023.

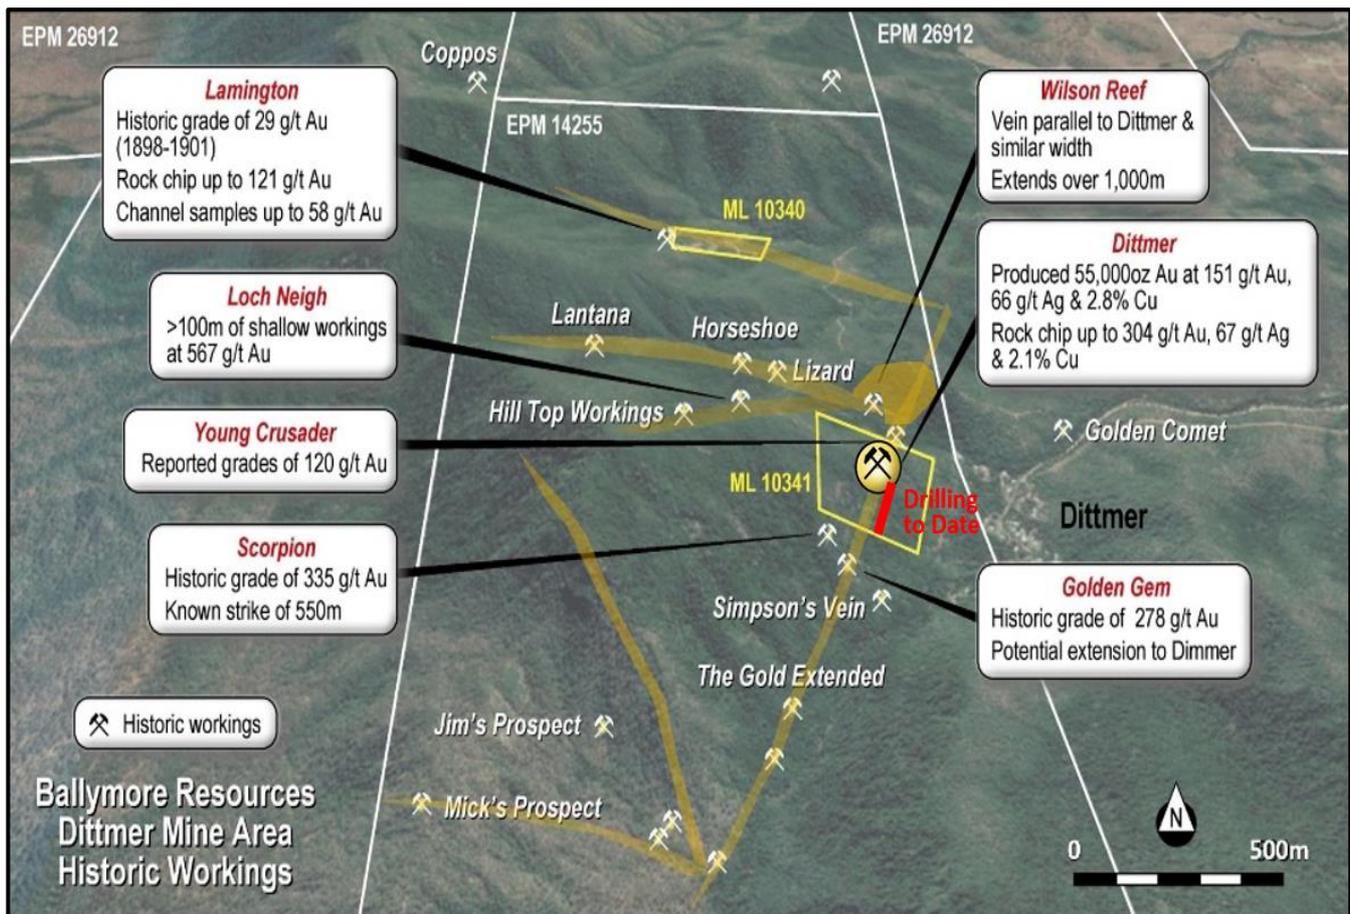

<sup>1</sup> DeRisk P2021-25: Independent Geologist Report – Queensland Exploration Assets - Ballymore Resources Ltd

**Figure 1** - Cross section of displaced Duffer Lode with underground workings and modelled lode extension confirmed by Ballymore drilling.

The Dittmer mining lease is surrounded by more than 2km of other shallow historic workings which were mined at extremely high grades (e.g. Loch Neigh – 567 g/t Au, Scorpion 355 g/t Au, Golden Gem – 278g/t Au) but have never been drill tested, much like Dittmer.

The area also hosts other significant old workings along a 20km trend which indicates that this could be part of a much larger gold +/- copper system similar in style to the Ravenswood mine (Queensland’s largest gold mine). Like Dittmer, historic mining at Ravenswood targeted a series of small high-grade deposits. Exploration led to a much larger system being recognised - over 4Moz in Resource and over 2.7Moz Au planned to be mined over next 14 years. Ballymore is applying a similar exploration approach at Dittmer.

**Figure 2** – Historic mine workings and interpreted structural corridors in the Dittmer area.

Recent soil sampling completed during the quarter has shown the surrounding region is highly anomalous for both gold and copper. Extremely high-grade gold results with individual assays up to **2206 ppb Au (2.2 g/t)** were returned from this soil sampling program, including the historic Dittmer mine and numerous unexplored, historic workings in the local area. The results confirm that the Dittmer mine forms part of a major mineralised system, as defined by these broad anomalies. Following these exciting geochemical results, follow-up prospecting has already commenced in the priority anomalous areas. In addition, preparations are underway to undertake further drilling at Dittmer, targeting high-grade mineralised shoots recognised in the previous drilling, and a detailed airborne magnetic survey is also planned to be completed this year to further complement these works and assist in defining further regional drill targets in the local area.

Subsequent to the end of the quarter, the company reported outstanding metallurgical test results at Dittmer which support current mine development studies to bring the project back into production<sup>2</sup>. The metallurgical test work, completed by independent consultants Core Metallurgy Pty Ltd, exceeded expectations for both conventional cyanide leach and flotation process.

- Cyanide leach results on the backfill ore up to 87.1% Au with further optimisation options available following LeachWELL™ testing showing 99% Au recovery on primary and backfill ore using extreme conditions.
- Flotation recoveries to cleaner concentrate of 87.9% Au, 91.5% Ag and 85.0% Cu were achieved for primary ore, and 85.4% Au, 78.5% Ag and 47.6% Cu for backfill ore.

The test work supports a simple and proven flow sheet to process the ore with great flexibility in identifying in-house and third-party processing options for future mine development. Gravity concentration test work was undertaken and has shown promise with gold recovery of 32.0% in Knelson

<sup>2</sup> Refer ASX Release dated 23 October 2023, Dittmer metallurgical testwork confirms excellent gold, silver and copper recoveries.

and tabling concentration with an upgrade from 9.1g/t to 113.0g/t for the primary ore. This demonstrates potential suitability for gravity recovery prior to flotation and/or cyanide leach following further studies. The company will continue to progress work at Dittmer including the completion of further field works and geophysical surveys and Stage 4 underground infill drilling.

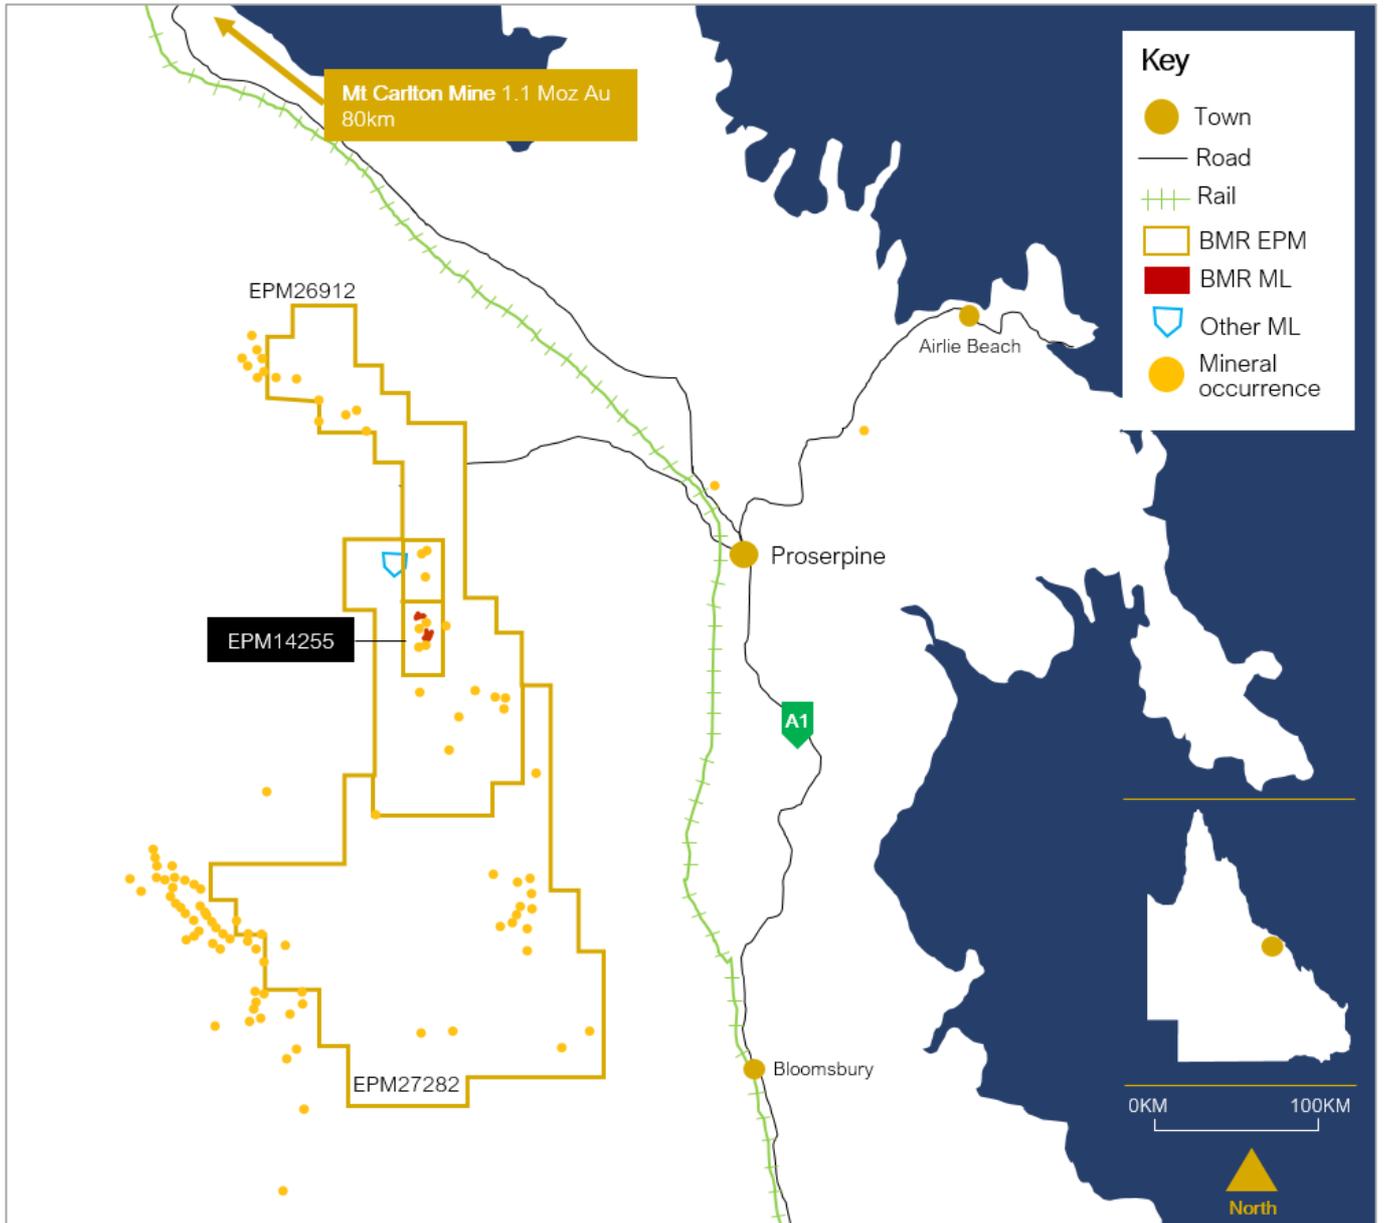

Figure 3 - Dittmer Project tenement location plan

# Ravenswood Project

Charters Towers, Queensland | 100% Ownership

EPM 18424, EPM 18426, EPM 18637, EPM 25466, EPM 25467, EPMA 28565

**The Ravenswood Project is located to the south and east of Charters Towers in North Queensland and consists of five granted EPMs covering an area of 309 km<sup>2</sup>. The Ravenswood Project contains numerous prospects, historic drill intersections and geochemical anomalies located within the 17 million ounce Charters Towers gold province including vein-hosted gold targets (e.g. Day Dawn, Pinnacle Creek) and Mount Leyshon style breccia pipe-hosted targets (e.g. Seventy Mile Mount, Matthews Pinnacle).**

Work to date has focussed on targeting the previously recognised hydrothermal breccia systems and vein systems that sit along the Mount Leyshon Corridor, including Seventy Mile Mount, Middle Mount and Matthews Pinnacle. Matthews Pinnacle is interpreted to represent the high-temperature core of a larger hydrothermal system, collectively referred to as the Pinnacle project, with gold mineralisation generally occurring peripheral to this hot core. Previous soil sampling did not cover the peripheral gold targets north and south of Matthews Pinnacle. During the previous quarter, mapping of the area north of Matthews Pinnacle was undertaken and veining with associated gold mineralisation was located. During the current quarter work commenced on mapping and soil sampling of this greater area with results expected next quarter.

**Figure 4** – Field work in the Pinnacle area.

In addition, access agreements were finalised with landowners to undertake drilling of the Day Dawn bonanza gold-silver target. This area hosts a series of stacked quartz veins that have reported high-grade gold and silver with assay results up to 127.5 g/t Au and 7,100 g/t Ag that has not previously been drilled. Cultural heritage clearances will be completed in the next quarter in preparation for drilling of this exciting target.

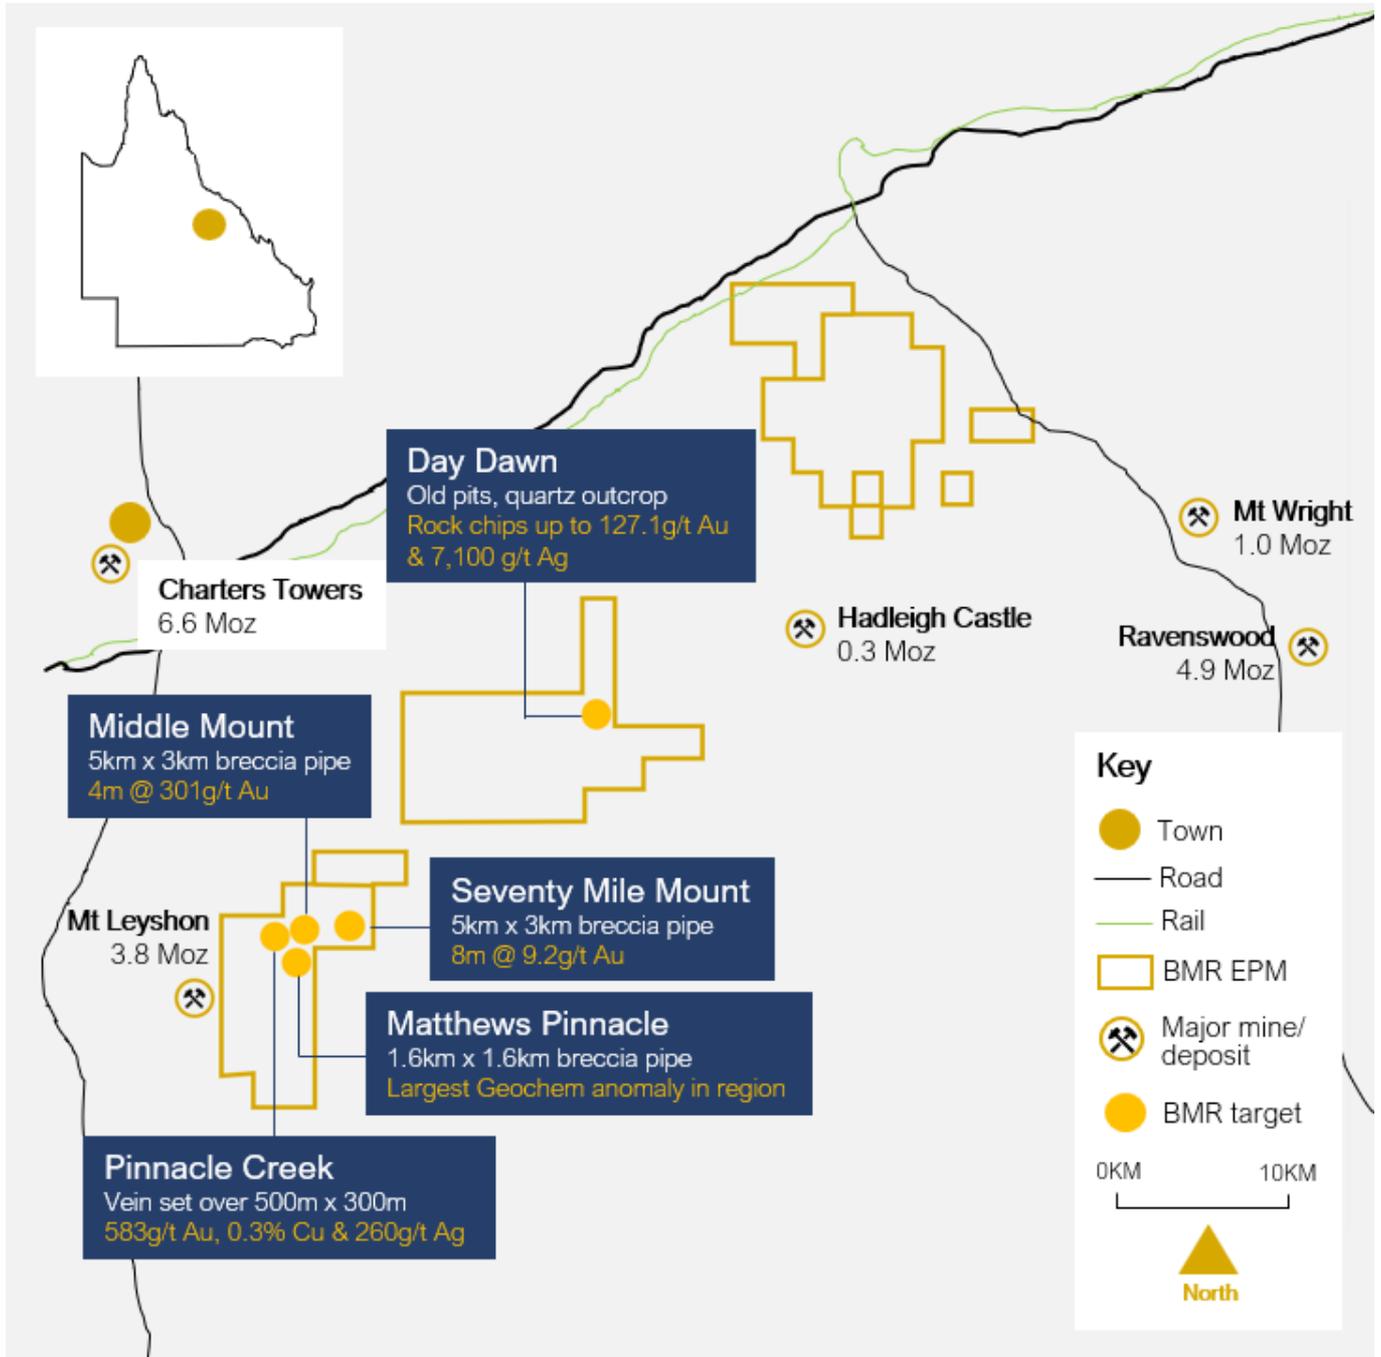

Figure 5 - Ravenswood Project tenement location plan

# Ruddygore Project

Chillagoe, Queensland | 100% Ownership  
EPM 14015, EPM 15047, EPM 15053, EPM 27840.

**The Ruddygore Project is located adjacent to the town of Chillagoe in North Queensland and approximately 150 km west of Cairns. It covers an area of 556 km<sup>2</sup>. Historically, Chillagoe was a significant mining and smelting centre that was most active from 1888 to 1927, prior to further substantial production of gold, copper and silver from the Red Dome mine from 1986 to 1997.**

Samples from historic pits at Ruddygore, Maniopota, Scardons Top Camp and Torpy's Crooked Creek were collected earlier in the year by a geological team led by Ballymore Technical Director, David Azzedin.

Further mapping and soil sampling of the northern extension of the significant Maniopota lead-zinc-copper-silver-gold mineralised system, located 25km south of Chillagoe, is in progress. In addition, preparations are underway to complete an IP survey over the main Maniopota prospect, testing an extensive zone of zinc-lead +/- copper mineralisation with associated historic workings with rock chip results collected by Ballymore reporting up to **22.2% Cu, 31.2% Pb, 13.8% Zn, 585 g/t Ag and 1.07 g/t Au**. Further mapping and field programs are also in preparation as well as drilling to test extensions to shallow copper at Ruddygore mine.

**Figure 6** - Exploration team in front of the Ruddygore main pit

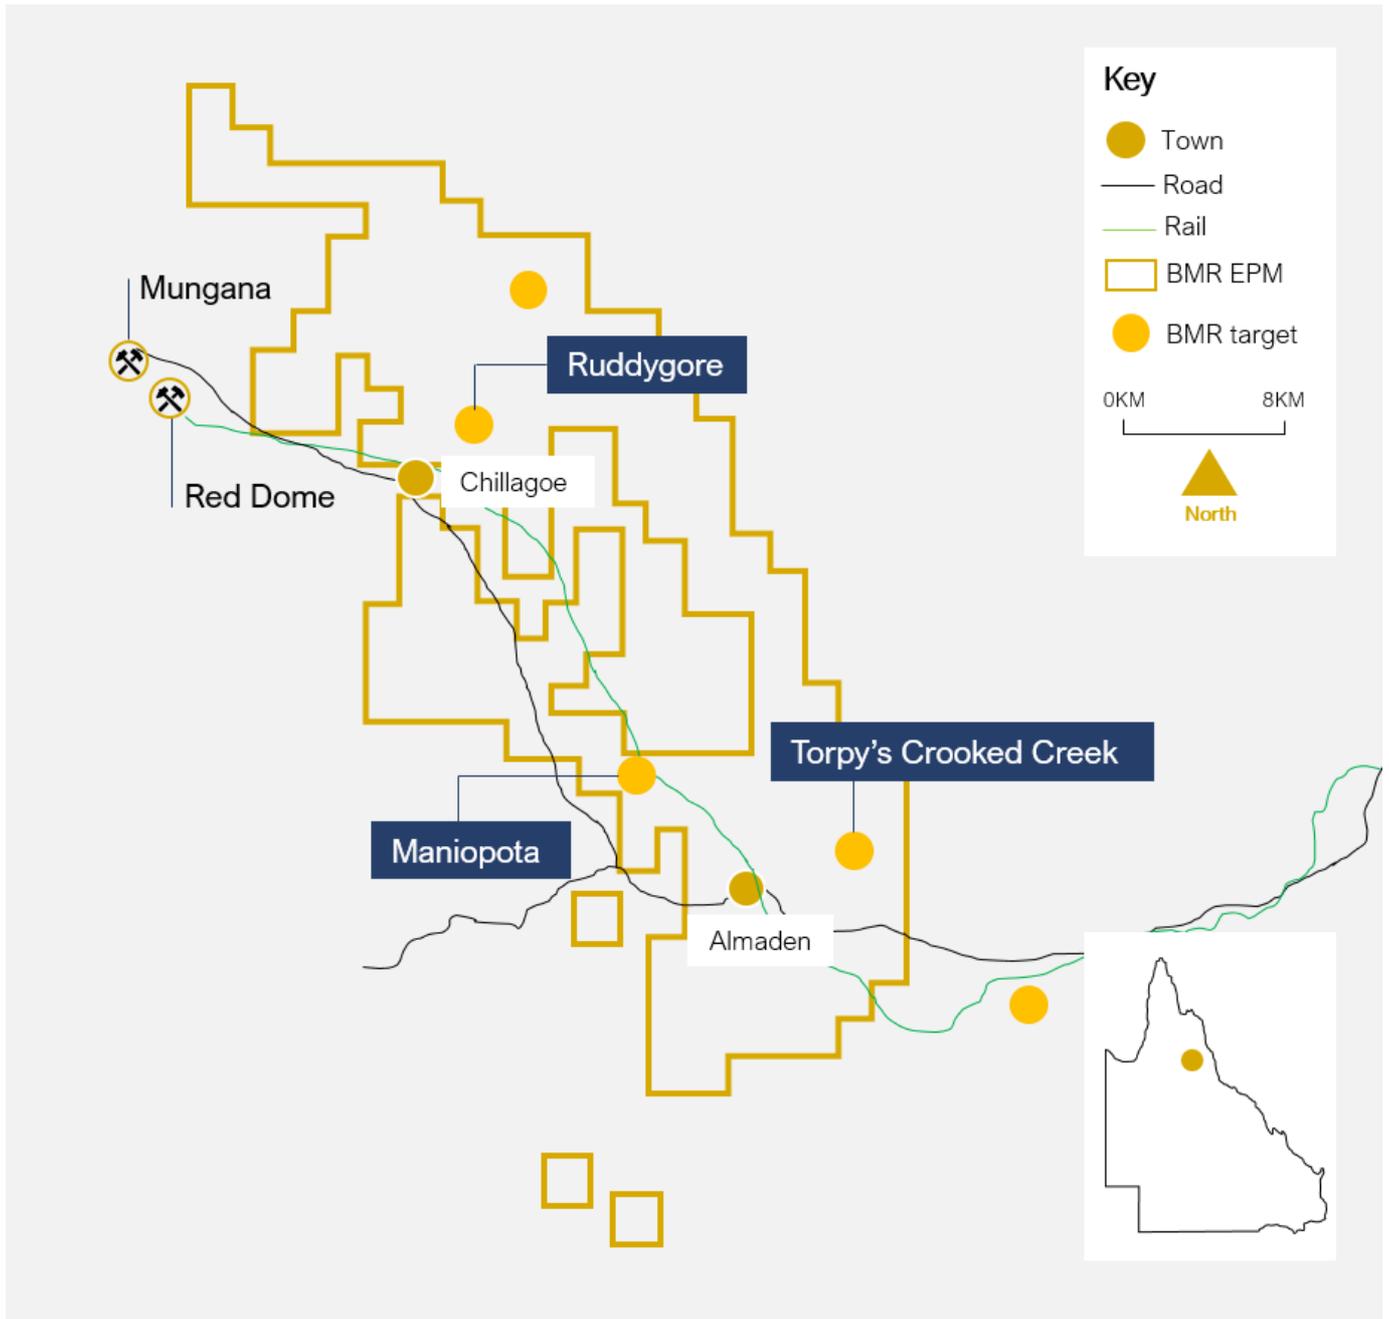

Figure 7 - Ruddygore Project tenement location plan

# Mount Molloy Project

Charters Towers, Queensland | 100% Ownership  
EPM 27918

**The Mount Molloy Project comprises one granted EPM covering an area of 78 km<sup>2</sup> and is located south of the town of Mount Molloy and 50 km northwest of Cairns. Mount Molloy represents a high-grade volcanogenic-hosted massive sulphide (“VHMS”) copper deposit that was discovered in 1883. The deposit was mined intermittently from 1883 to 1942 with ore zones assaying up to 20% copper. There was also a significant amount of high-grade zinc ore encountered, but this was not mined due to the lack of market at the time. Production figures are incomplete, although records suggest a total of 43,600 tons of ore was mined, producing 3,900 tons of copper metal at 8.7% Cu.**

A site visit was undertaken to Mount Molloy in February and confirmed that the Mount Molloy area hosts extensive copper mineralisation within a north-south corridor of folded sediments. Substantial oxide copper mineralisation was observed in outcrop, mullock stockpiles and waste dumps and rock chip assay results have confirmed the high copper grades historically reported in this deposit. **Out of the 21 samples collected, 18 samples exceeded 1% Cu and 14 samples exceeded 10% Cu with a best result of 31.81% Cu, 2.28% Zn and 300 g/t Ag.**

As follow-up to these exciting initial results, field work was undertaken at Mount Molloy in the previous quarter, including prospecting, geological mapping and soil sampling. An initial soil grid was sampled on a 100m x 50m grid and closed in to a 50m x 50m grid over the main historic mine area. Results have subsequently been received and verified a highly anomalous corridor that extends for over 1,000m x 300m and remains open along strike to the north and south. The copper mineralisation shows a strong association with zinc, lead, silver, indium and selenium. Maximum assay values for the soils include 103 ppb Au, 3.01 ppm Ag, 3933.4ppm Cu, 9.152% Fe, 4262.2 ppm Mn, 739.2 ppm Pb, 47.27 ppm Se and 1674.3ppm Zn.

A significant soil anomaly is defined over the main Mount Molloy mine area. In addition, a significant anomaly occurs north of the mine area, centred over a hill with a historic adit developed into it through copper-stained brecciated sediments. This anomaly remains open to the north and is untested by drilling, with the focus of previous drilling being on testing the mine area.

Extensions to the current soil grid are planned to test the potential extension to the defined soil anomalies and test the mineralised corridor further to the north and south. Other planned work includes further mapping and prospecting of the mineralised corridor and a possible geophysics survey to assist in delineating additional lenses of mineralisation.

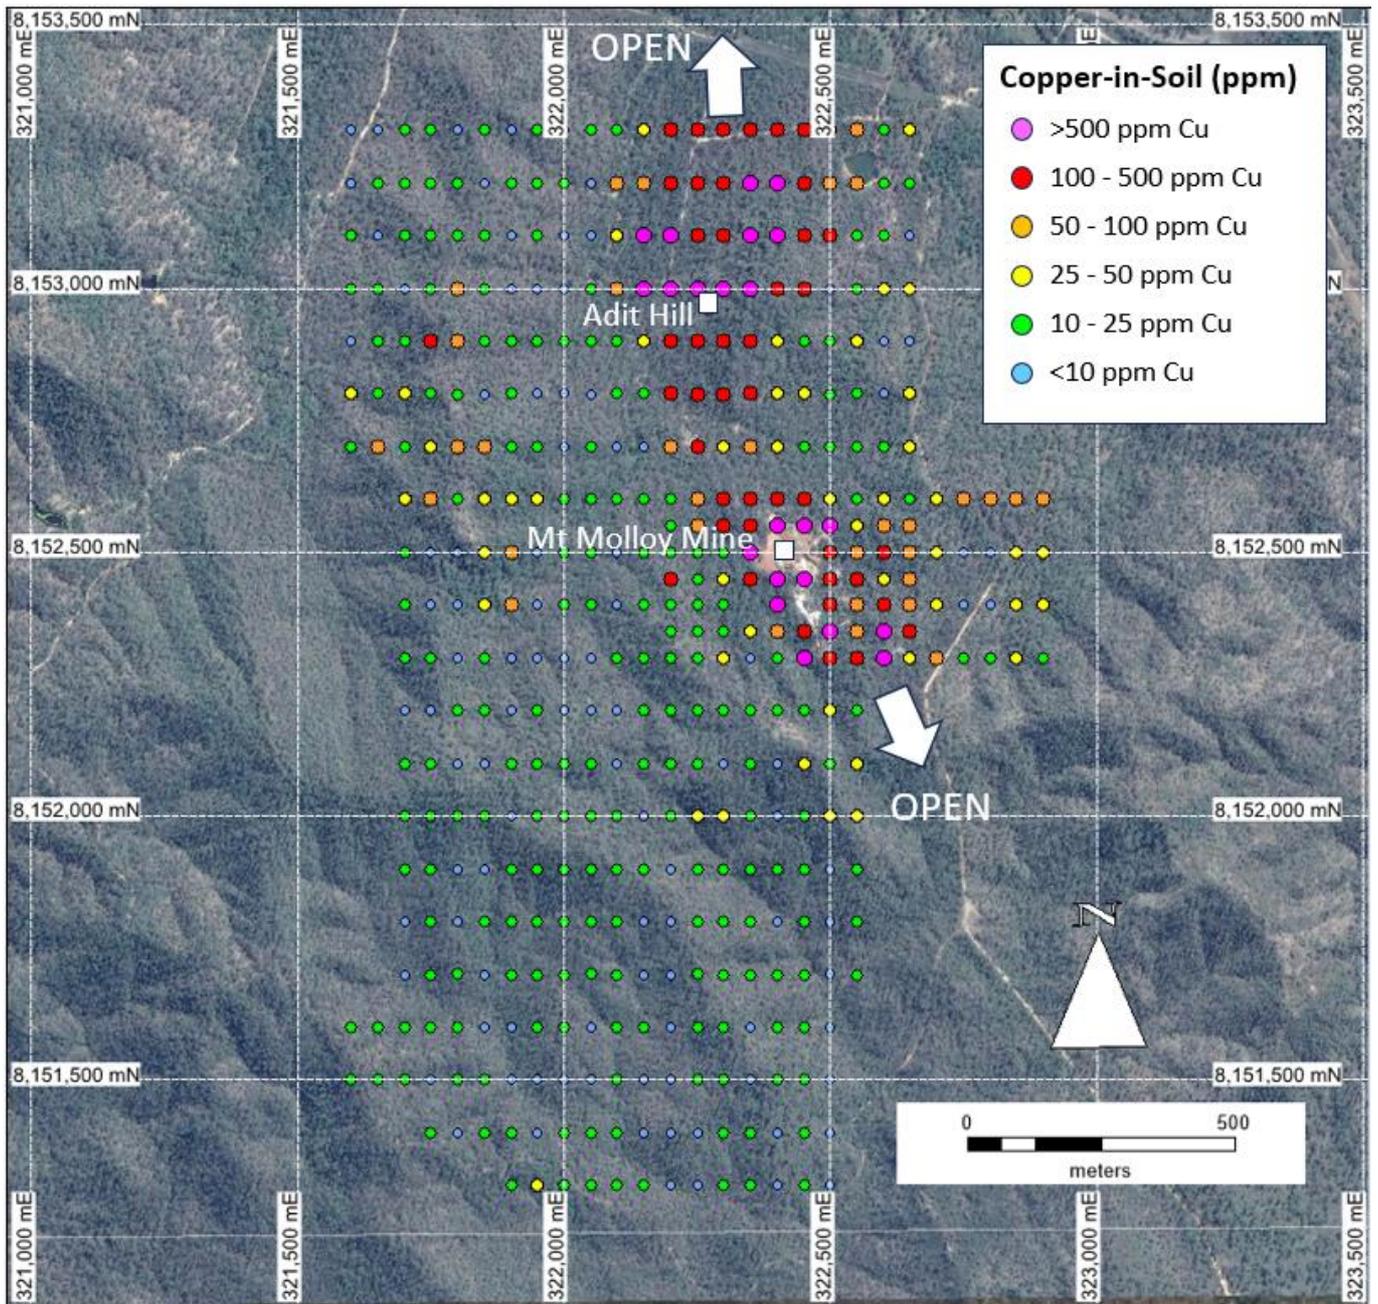

Figure 8 – Mount Molloy soil results for copper.

# Corporate

## Board and Management Changes

Ballymore appointed Mr Andrew Greville as the Non-Executive Chairman of the Company on 3 July 2023<sup>3</sup>.

Mr Greville has served Ballymore's board as a Non-Executive Director since December 2021, shortly after the Company's IPO.

A qualified mining engineer, Mr Greville is a senior international mining executive with nearly 40 years' experience across business development, mergers and acquisitions, product marketing and strategy.

He has previously served as Executive General Manager, Business Development and Strategy, at Xstrata Copper where he oversaw many major project transactions. Prior to that, he served in a range of senior operational and product marketing roles, including five years as Vice President, Ores and Concentrates for Pechiney SA, and three years as Vice President, Commercial for BHP Copper. In these roles he managed a number of significant project transactions as well as copper concentrate sales globally.

Mr Greville is a member of the Australian Institute of Company Directors and has served as a director of a number of junior listed mining companies throughout his career. He is also the founder and Managing Director of West End Mining & Consulting (Wemco), a mining market consulting organisation. Founding Chairman and significant shareholder, Mr Nick Jorss, will stay on the Board as a Non-Executive Director.

## Cash Position

As at 30 September 2023, the Company held \$0.7 million cash at bank.

## ASX Listing Rule 5.3 Disclosure

\$0.52m exploration spend during the quarter can be summarised as:

- \$0.25m on mapping, soil sampling and metallurgical testwork and mining studies on the Dittmer project;
- \$0.14m on mapping and soil geochemical surveys and preparations for drilling on the Ruddygore project;
- \$0.10m on mapping and soil sampling and preparations for further drilling activities at the Ravenswood Project; and
- \$0.03 on soil sampling and mapping on Mount Molloy and discussions with local landholders.

\$164,000 was paid during the quarter to Related Parties, as reported in clause 6 of the ASX Appendix 5B (Cash Flow Report). This comprises directors' fees.

---

<sup>3</sup> BMR ASX Release 3 July 2023, Ballymore appoints new Chairman

### ASX Announcement during the quarter

The following announcements were lodged on the ASX Market Announcements Platform during the quarter:

Date	Description
3-Jul-23	Ballymore appoints new Chairman
4-Jul-23	Dittmer Mine Studies Underway After Further Positive Results
19-Jul-23	Noosa Mining Investor Presentation – July 2023
31-Jul-23	Quarterly Activities/Appendix 5B Cash Flow Report
17-Aug-23	Release of Securities from Escrow
31-Aug-23	Application for quotation of securities - BMR
31-Aug-23	Section 708A Notice
31-Aug-23	Notification of cessation of securities - BMR
26-Sep-23	Annual Report to shareholders
26-Sep-23	Corporate Governance Statement
26-Sep-23	ASX Appendix 4G
28-Sep-23	2023 Annual General Meeting

These announcements are available for viewing on the Company's website [ballymoreresources.com](http://ballymoreresources.com).

# Tenement Interests

As at 30 September 2023, the Company had interests in the following tenements (as required by Listing Rule 5.3.3). There were no changes in the Company's interests in tenements during the quarter.

Country	Location	Project	Tenement	Status	Current Interest (%)
Australia	Queensland	Dittmer	ML 10340	Granted	100%
Australia	Queensland	Dittmer	ML 10341	Granted	100%
Australia	Queensland	Dittmer	EPM 14255	Granted	100%
Australia	Queensland	Dittmer	EPM 26912	Granted	100%
Australia	Queensland	Dittmer	EPM 27282	Granted	100%
Australia	Queensland	Ruddygore	EPM 14015	Granted	100%
Australia	Queensland	Ruddygore	EPM 15047	Granted	100%
Australia	Queensland	Ruddygore	EPM 15053	Granted	100%
Australia	Queensland	Ruddygore	EPM 27840	Granted	100%
Australia	Queensland	Ravenswood	EPM 18424	Granted	100%
Australia	Queensland	Ravenswood	EPM 18426	Granted	100%
Australia	Queensland	Ravenswood	EPM 18637	Granted	100%
Australia	Queensland	Ravenswood	EPM 25466	Granted	100%
Australia	Queensland	Ravenswood	EPM 25467	Granted	100%
Australia	Queensland	Mount Molloy	EPM 27918	Granted	100%
Australia	Queensland	Ravenswood	EPMA 28565	Application	N/A
Australia	Queensland	Dittmer	MLA 100351	Application	N/A

**Approved by the Board of Ballymore Resources Limited.**

# Company Profile

Ballymore holds a portfolio of exploration and development projects in prolific Queensland mineral belts that are highly prospective for gold and base metals. These consist of two granted Mining Leases (MLs) and fourteen Exploration Permits over four project areas at Dittmer, Ruddygore, Ravenswood and Mount Molloy. The total area covered by the tenements is 1,456 km<sup>2</sup>.

Known deposits in Northeast Queensland include Kidston (5 Moz Au), Ravenswood/Mount Wright (5.8 Moz Au), Mount Leyshon (3.8 Moz Au), Red Dome/Mungana (3.2 Moz Au) and Mt Morgan (7.8 Moz Au and 374 Kt Cu). The deposits occur in a wide range of geological settings including porphyries, breccias, skarns and veins.

# Important Notices

## Competent Persons Statement

The information in this announcement that relates to Exploration Results is based on information compiled or reviewed by Mr David A-Izzeddin. The Company is not aware of any new information or data that materially affects the information included in these Company Announcements and in the case of reported Mineral Resources, all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. Mr A-Izzeddin is a Member of The Australasian Institute of Geoscientists and is a Director and an employee of the Company. Mr A-Izzeddin has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr A-Izzeddin consents to the inclusion in the announcement of the matters based on his information in the form and context in which it applies. The Exploration Targets described in this announcement are conceptual in nature and there is insufficient information to establish whether further exploration will result in the determination of Mineral Resources.

## Exploration Results & Exploration Target

Ballymore confirms that Exploration Results and Exploration Targets used in this document were estimated, reported and reviewed in accordance with the guidelines of the Australian Code for the Reporting of Exploration Results, Mineral Resources and Ore Reserves (The JORC Code) 2012 edition. Ballymore confirms that it is not aware of any new information or data that materially affects the Exploration Results or Exploration Target information included in the following announcements:

- \*1 - Ballymore Prospectus released on 1 September 2021
- \*2 - "Acquisition of 100% of Ravenswood Project" released on 18 November 2021
- \*3 - "Initial Results for Dittmer Underground Sampling & Drilling", released 29 September 2021
- \*4 - "High Grade Drilling Results and Visible Gold at Dittmer", released 25 October 2021
- \*5 - "Assay Results Confirm Gold-Copper Discovery at Dittmer" released 19 July 2022
- \*6 - "High Grade Intersections Confirm Dittmer Orebody Extension" released 16 March 2023
- \*7 - "High Grade Rock Chips Confirm Copper Potential at Mt Molloy" released 20 March 2023
- \*8 - "Drilling & visible gold confirm Dittmer Gold Mine Extension" released 11 April 2023
- \*9 - "New bonanza gold grades validate planned Dittmer Mine reopening study" released 2 May 2023
- \*10 - "Dittmer Mine Studies Underway Following Further Positive Drill Results" released 4 July 2023
- \*11 - "Outstanding Dittmer Results Confirm Major Mineralised System" released 16 October 2023
- \*12 - "Dittmer metallurgical testwork confirms excellent gold, silver and copper recoveries" released 23 October 2023

## Forward-Looking Statements

Certain statements made during or in connection with this statement contain or comprise certain forward-looking statements regarding the Company's Mineral Resources, exploration operations and other economic performance and financial conditions as well as general market outlook. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, such expectations are only predictions and are subject to inherent risks and uncertainties which could cause actual values, results, performance or achievements to differ materially from those expressed, implied or projected in any forward-looking statements and no assurance can be given that such expectations will prove to have been correct.

Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, changes in economic and market conditions, delays or changes in project development, success of business and operating initiatives, changes in the regulatory environment and other government actions, fluctuations in commodity prices and exchange rates and business and operational risk management. Except for statutory liability which cannot be excluded, each of the Company, its officers, employees and advisors expressly disclaim any responsibility for the accuracy or completeness of the material contained in this statement and excludes all liability whatsoever (including in negligence) for any loss or damage which may be suffered by any person as a consequence of any information in this statement or any error or omission. The Company undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after today's date or to reflect the occurrence of unanticipated events other than required by the Corporations Act and ASX Listing Rules. Accordingly, you should not place undue reliance on any forward-looking statement.

6.2	Aggregate amount of payments to related parties and their associates included in item 2	105*

*Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.*

*\*Note: the amount shown for item 6.2 represents wages paid for executive directors charged directly to capitalised exploration expenditure (in accordance with the accounting standards).*

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

<b>7. Financing facilities</b>	<b>Total facility amount at quarter end \$A'000</b>	<b>Amount drawn at quarter end \$A'000</b>
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity. Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1 Loan facilities	N/A	
7.2 Credit standby arrangements		
7.3 Other (please specify)		
7.4 <b>Total financing facilities</b>		
7.5 <b>Unused financing facilities available at quarter end</b>		
7.6 Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.		

<b>8. Estimated cash available for future operating activities</b>	<b>\$A'000</b>
8.1 Net cash from / (used in) operating activities (item 1.9)	(267)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(517)
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(784)
8.4 Cash and cash equivalents at quarter end (item 4.6)	691
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	691
8.7 <b>Estimated quarters of funding available (item 8.6 divided by item 8.3)</b>	0.9
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: No, there was a high level of exploration spend during the last four quarters, with fairly constant drilling programs at all three of the Company's main projects, most recently a lengthy program at Dittmer. While active exploration continues on the Company's projects, drilling has ceased while we fully evaluate the Dittmer results, so drilling and laboratory costs are expected to be much lower in the December and March quarters. The upcoming wet season will also curtail drilling and some field work activities.	

## Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?

Answer: As per normal, the Board evaluates the need for further cash to fund its operations on a monthly basis. The Board has a very successful track record of raising funds for Ballymore, and other exploration and development companies. The Board is currently evaluating various funding opportunities that may include an equity raising and/or project level financing, joint venture or farm-out arrangement.

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

Answer: Yes, as noted above there was high levels of exploration spend during the last four quarters due to ongoing drilling programs. Currently all tenements remain in good standing due to the high level of exploration spend during the previous quarters. This allows for flexibility in activities in the December and March quarters. While active exploration continues on the Company's projects, the upcoming (December 2023 and March 2024) quarterly spend is expected to be lower. The upcoming wet season will also curtail drilling and some field work activities. When additional funds are required, the Board has a very successful track record of raising funds for Ballymore and other exploration and development companies, and as noted above is currently evaluating various funding opportunities.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

## Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

## Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
